### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to an ultraviolet curable lubricious coating, classified in class 523, subclass 105.
  - II. Claims 12-32, drawn to a medical device, classified in class 428, subclass 411.1.
  - III. Claims 33-43, drawn to a method of coating a surface of a medical device, classified in class 427, subclass 2.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP §808.01). In the instant case the different inventions have different effects.
3. Inventions II and III are related as product and process for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different product, or (2) the product as claimed can be used to practice another and materially different process of using that product. (MPEP § 806.05(h)). In this case the product as claimed can be used to practice another and materially different process, such as a medical device that does not include a coating on a tubular member. The method of invention III does not recite the steps necessitating the need to expose the coating to ultraviolet radiation, and therefore is not limited to be performed by the medical device of invention II. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art

Art Unit: 3734

as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
